

Prospec has done extensive testing on complete Prospec range of Stair Treads and as a result, a range of cleaning products has been recommended for use.

The cleaning products listed below are suitable for all Prospec Stair Treads.

Product Description
Neutral Cleaners
General Purpose Cleaners
General Purpose Bactericidal Cleaners
Heavy Duty Alkaline Cleaners

1. All tread should be swept with a broom or vacuumed with a heavy-duty commercial vacuum cleaner, at least once a week.
2. External Treads should be periodically scrubbed with a stiff bristled brush using any commercial all purpose cleaner and thoroughly rinsed with clean water after cleaning.
3. Minor traffic marks on aluminum can be cleared by using fine steel wool and commercial cleaning agent.
4. Oil and Grease from the stair treads can be removed by using soap and brush. Rinse with clean water after cleaning.
5. For removing snow and ice from external treads, use sodium chloride salt.
6. To remove chewing gum from all types of stair treads, use putty knife, wire brush, clean cloth, commercial cleaning liquid, sponge & clean water. First scrape off as much chewing gum as possible with putty knife, soak it with commercial cleaning liquid for stubborn chewing gums. Repeat the process several times until desired result is achieved. Scrub with wire brush and clean the tread using soap and water, finally sponge the tread and remove extra water from the tread.
