Table 2: Key to System Features:

XYA Series	XYB Series	XYS Series
1. Integrated Silicone Seal	1. Integrated Silicone Seal	1. Integrated Silicone Seal
2. Aluminum, 6063-T6, MF	2. Brass, CZ108, MF	2. Stainless Steel, 304/316, MF
3. Perforated Holes	3. Perforated Holes	3. Perforated Holes
		

XY Series Field Limitation Joint is created for setting Porcelain, Marble and Granite flooring with variable heights that are normally subject to expansion and compression. These profiles are particularly recommended for small as well as large areas in correspondence of the underlying foundation to lessen and/or absorb floor vibrations.

Field Limitation Joints are supplied in 10' (3m) standard length and are made of aluminum (**XYA**), brass (**XYB**), and stainless steel (**XYS**), encasing an elastic section of Silicone with standard color of black (**BK**), beige (**BG**), grey (**GY**), and white (**WH**). The perforated anchor tabs ensure a perfect grip into the screed or bed by the continuous perforated footplates on either side which provide a very firm anchor throughout its entire length.
